

# Discovering cosmic rays with OCRA

Outreach activities for students and teachers

Sabine Hemmer | INFN Sezione di Padova for the OCRA collaboration

OCRA provides a framework for all national and local INFN outreach activities on cosmic rays, ranging from the ICD over science camps, creation of online activities and educational materials and teacher training to a huge variety of local events.

Here we will give an overview on all activities offered by OCRA with a particular focus on the 2020 online event organized in occasion of the International Cosmic Day, that saw the participation of more than 3000 students.
