# FACT – Highlights from more than 8 years of Unbiased TeV Monitoring

- Major Goals:
  - Establish SiPMs in Cherenkov Astronomy ✓
  - Robotic Operation ✓
  - Unbiased Monitoring of Blazars ✓
- Unprecedented data sample (> 8 years)
  - Unbiased, densly-sampled light curves
    - → Systematic variability studies
    - → Unbiased multi-wavelength studies
  - Target-of-opportunity observations
  - Low-latency quick-look analysis
    - → Flare alerts
    - → Multi-wavelength studies
- Results

Up to 2400 h/year

Maximized duty-cycle Minimized gaps

Check-out our proceedings:
Summary: 851
Mrk 421: 834, 866, 869
Mrk 501: 808
Variability: 868, 879
other: 760, 858, 865, 960
MWL: 808, 834, 866, 869
